125 ml

Natural, plant-based sweetener.

COSMETICS

Bánfi hair tonic

The active substances of Bánfi hair tonic increase blood circulation, thus increasing the oxygen supply of the scalp. They improve the condition of hair-bulbs, making the hair stronger and thicker.

Lady Bánfi hair tonic

The active substances of Bánfi hair tonic increase blood circulation, thus increasing the oxygen supply of the scalp. They improve the condition of hair-bulbs, making the hair stronger and thicker.

Bánfi shampoo

The active substances of Bánfi shampoo increase blood circulation, thus increasing the oxygen supply of the scalp. They improve the condition of hair-bulbs, making the hair stronger and thicker. The shampoo contains the alcoholic base of the Bánfi hair tonic as well as hydrating components.

Bánfi hair balm

Thanks to its active substances, the Bánfi hair balm strengthens and restores the structure of the damaged hair and makes the hair shinier and easier to brush after its use.

Burdock hair tonic

The product containing burdock root extract normalises the functioning of the sebaceous glands, its use as a regularly scheduled therapy reduces the excessive pinguefaction of the hair and prevents dandruff formation..

Burdock shampoo 2in1

A shampoo containing burdock root extract, which can be used to treat greasy hair to great effect. It is especially efficient to counterbalance the pinguefaction occurring during adolescence. Thanks to the burdock root which has been used since ancient times and to the other hair and skincare ingredients, the shampoo has a positive effect on the hair and skin. It provides the hair with a naturally shiny texture.

Nettle shampoo for dry hair

Shampoo containing nettle extract for the nurturing of the scalp and nourishment of the hair. The hydrolyzed keratin strengthens and hydrates, while glycerin protects the hair from dryness. Panthenol (Provitamin B5) provides the hair with an easily brushable texture.

Nettle shampoo for normal hair

A product developed in the laboratory of Herbária Ltd. containing a special nettle (*Urtica Dioica*) extract. Due to the ingredients of the shampoo, it increases the blood circulation of the scalp and gently cleanses the hair.

Nettle hair tonic for dry hair

Due to the nettle extract, the Nettle hair tonic increases the blood circulation of the hair, is effective in reducing hair loss and reinvigorates the scalp.

Nettle conditioning balm for dry hair

Due to its ingredients, the balm conditions and hydrates the hair, thus giving back its flexibility and strength. The application of the nettle balm makes the hair easy to handle. It is also recommended for dry, dyed and heavily stressed hair. The balm contains nettle extract and panthenol.

Alcohol-free hair serum with caffeine, camomile and calendula extract

Due to its caffeine and Vitamin B3 components, it stimulates the blood circulation of the scalp, boosts the functioning of the hair-bulbs, nourishes hair roots, thus positively affecting hair-growth and making the hair thicker and stronger. Camomile and Calendula extracts along with the hydrating components gently nurture the hair and scalp. If the product is placed standing, the natural residue on the bottom of the bottle is formed by natural herbs, which does not affect the overall quality of the product.

Hair tonic with caffeine and ginseng extract

Due to its caffeine and Vitamin B3 components, it stimulates the blood circulation of the scalp, boosts the functioning of the hair-bulbs, nourishes hair roots, thus positively affecting hair-growth and making the hair thicker and stronger. It provides the scalp with a refreshing sensation thanks to the alcoholic ginseng extract. If the product is placed standing, the natural residue on the bottom of the bottle is formed by natural herbs, which does not affect the overall quality of the product.

Levander balm

Levander flower (*Lavandula angustifolia* Mill.) has a high aromatic oil content, which has been a home-remed since ancient times. the efficiency of the oil naturally extracted from the flower is unparalleled when it comes to the relaxation and regeneration of tired, sore muscles and joints. It is exceptionally suitable for touring, sports, and any other type of movement that results in increased stress for the body parts.

Calendula balm

The calendula extract in this product facilitates the regeneration of the skin along with the dead epidermic cells - especially around the heels, elbows and knees. Thanks to its ingredients, the balm has a skin-softening, skin-renewing, and slight relaxing effect. Due to its ingredients, the balm is perfectly suitable for the treatment of the skin throughout the whole body surface.

Common comfrey balm

Common comfrey was already known by the ancient Greeks and Romans, as they applied it after battles as "bone-binder". For the modern person, this balm is recommended for the easing of the unpleasant feeling that occurs after sport activities or tiring physical work. For the alleviation of the symptoms, it is recommended to use this easily absorbed balm twice a day. The menthol content of the balm refreshes and cools the skin.

Rosemary balm

Rosemary balm has a pleasant texture, is easily absorbed and has a pleasant rosemary aroma. Its valuable active and additional substances enhance the blood circulation of the upper skin layers as well as that of the deeper muscles. Its hydrating components ensure the flexibility of the skin. It is suitable for the warming up of the muscles prior to training, as well as for the treatment of concerned body parts in case of musculoskeletal disturbances. Suitable for every skin type.

Hand balm

Calendula, Aloe Vera and Camomile oil – the active substances of the product – facilitate the natural regeneration of the skin and provide a slight skin-relaxing effect. General nourishing balm for every skin type. Its use enables the dry skin to recover its flexibility and hydration after being exposed to strain (windy, cold weather, effects of dish soap, garden work).

Horse-chestnut cream Forte

Thanks to the American witch-hazel (*Hamamelis Virginiana* L.) and horse-chestnut (*Aesculus Hippocastanum* L.), this product refreshes and cools the heavy, varicose legs. It hydrates, nourishes the skin and recovers its flexibility. Due to the increased active substance content, it provides a more intense treatment for the tired, swollen, sore leg. For the treatment of the symptoms, the balm should be applied twice a day by gently massaging it into the skin.

Venenherb balm

The American witch-hazel (*Hamamelis Virginiana* L.) is a North-American herb, the origin of which is signalled by its Latin name (*Virginia*). The curative power of the husk has already been highly regarded by the Native Americans, it was used by them to treat bulges, bruises, vasodilatation and insect bites. Horse-chestnut seed (*Hippocastani semen*) extract. Thanks to its ingredients, the Venaherb balm is perfectly suitable for the treatment of the tired, swollen, sore leg. For the treatment of the symptoms, the balm should be applied twice a day by gently massaging it into the skin.

Bano Calendula cream

Due to the oily extract of calendula, this cream has a valuable skin-nurturing and regenerating quality to it. Its active substances are anti-inflammatory and exfoliating. It is suitable for the nourishing of cracked, course skin and for the treatment of superficial bruises and skin damages.

Bano Doctor heel balm

The Doctor heel balm is a product developed for the cracked, dry skin and for the everyday treatment of the heels and legs in general. Thanks to its hydrating, skin-softening components, this balm containing plant oils turns course, rough skin to smooth and soft.

Bitter almond flavoured mouth-wash with smoke tree

This mouth was with smoke tree (bitter almond flavoured) contains smoke tree and thyme extract. Due to its herbal active substances, it reduces the inflammation and bleeding of the gums. Rinsing with the mouth-wash complements the cleaning of the teeth and dental hygiene. The fresh, pleasant breath remains long after its use. The sour, contractive sense caused by the mouth-wash is natural. The effectiveness of the product is proved by clinical examination.
